Address: Noida 62, India

SKILLS

- **Backend:**
- .NET Core (.NET 6/7/8), ASP.NET Core Web API, gRPC
- **Architecture:**
- Microservices Architecture, Clean Architecture, CQRS, MediatR, SOLID Principles
- **Cloud (Azure):**
- Azure App Services, Azure AD (SSO), Azure Key Vault, Azure Storage
- DevOps & Deployment:
- CI/CD Pipelines, Azure DevOps, Git, Release Management
- **Database:**
- SQL Server, Entity Framework Core
- **API & Integration:**
- REST APIs, API Gateway (Ocelot), Middleware
- **Tools:**
- Visual Studio, Visual Code, Postman, DevExpress

EDUCATION

Master of Computer Applications (MCA)

Integral University, Lucknow, 2018-2020

Bachelor of Computer Applications (BCA)

Integral University, Lucknow, 2015-2018

ADDITIONAL INFORMATION

- Good understanding of system design and scalable architecture
- Experience with Agile/Scrum methodology
- Strong problem-solving and debugging skills
- Experience in handling end-to-end deployment process

EXPERIENCE

Chetu India Pvt. Ltd., Noida

Senior .NET Developer | Oct 2022 – Mar 2026

- Designed and developed microservices-based applications using .NET Core
- Applied Clean Architecture and CQRS for better scalability and maintainability
- Integrated Azure AD SSO for secure authentication and role-based access
- Deployed applications on Azure App Services and managed configurations
- Used Azure Key Vault for secure storage of secrets and connection strings
- Built and maintained CI/CD pipelines for automated build and deployment
- Improved API performance and handled error logging and monitoring
- Actively participated in client discussions and architecture decisions

Parsh Digital Services LLP, Noida

.NET Developer | Jul 2020 – Sep 2022

- Developed web, Windows, and console applications
- Designed and maintained SQL Server databases
- Delivered multiple projects end-to-end

KEY PROJECTS

Cybersecurity Enterprise Application –

- Developed centralized system for managing security policies and access control
- Implemented authentication using Azure AD
- Created reporting system for monitoring security and compliance

Hotel & Hospitality Management System

- Built scalable platform for accommodation and booking management
- Designed APIs for handling booking, onboarding, and lifecycle operations
- Improved system performance and usability

Claim Management System US-Based Client

- Managed complete claim lifecycle (creation to settlement)
- Developed validation and approval workflows
- Supported both legacy (VB.NET) and modern (.NET Core) systems
- Handled production issues and ensured smooth deployments
